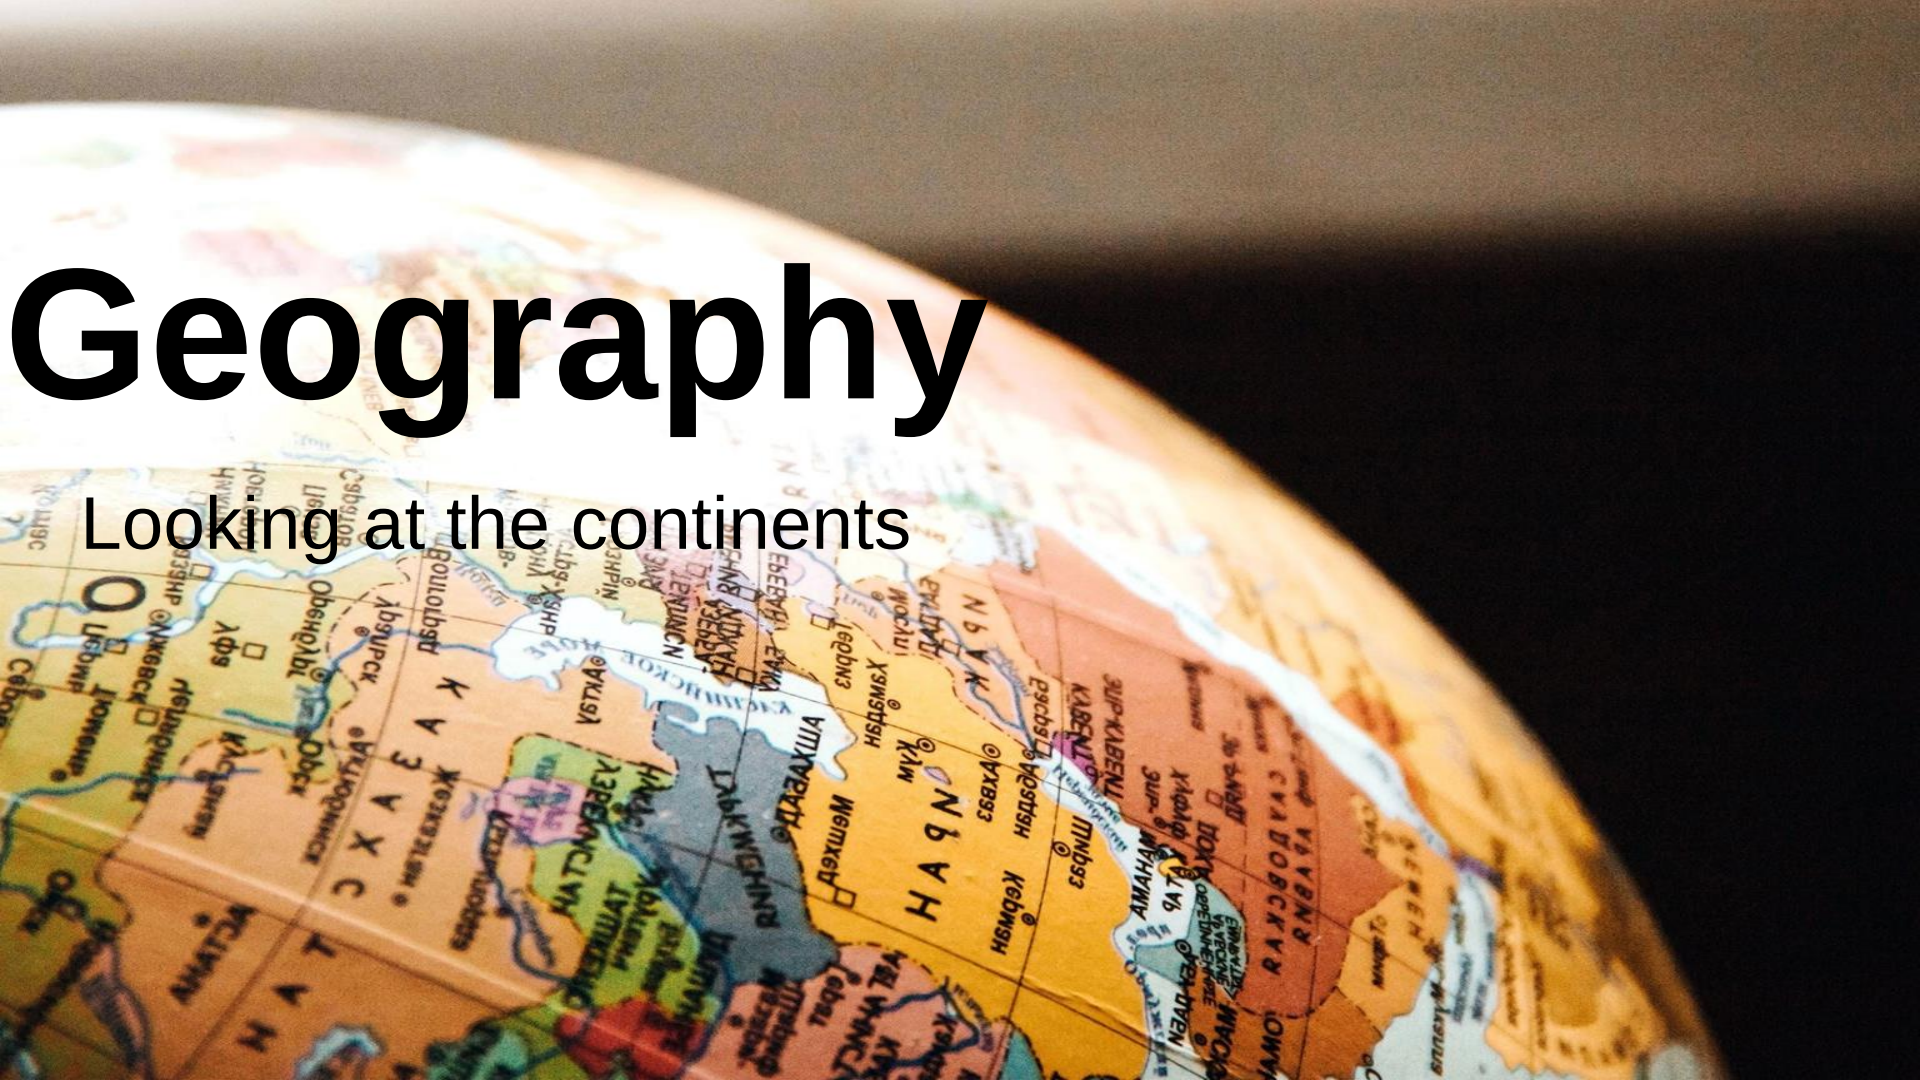
Geography

Looking at the continents



What do we already know about the world around us!

Over the next 2 lesson we are going to look at all the amazing facts that you have gathered over the last 2 weeks on continents. We will start by labeling a map of the world and then move onto each slide filling them out as we go. This is your chance to tell me what you know and even show me what you know. You can add photos, facts or even a reflection if you have been to a particular country in that continent. Do not limit yourself only to the information that you have already watched over the last 2 weeks. Do some independent research and get to know this amazing world around us.

Each slide only has the name of the continent. It is up to you to create the page anyway you want. Use backgrounds, pictures, text boxes, colour etc to bump up each page

Here are some things that you can add to your page about each continent

How many countries in that continent?
Total population
Largest country
Smallest country
Largest city
Are there any Islands part of this continent
Longest river
Highest mountain
Biggest lake
Driest Place
History
The people
Languages spoken
Religion
Main tourist attractions
Animals
Main natural resource

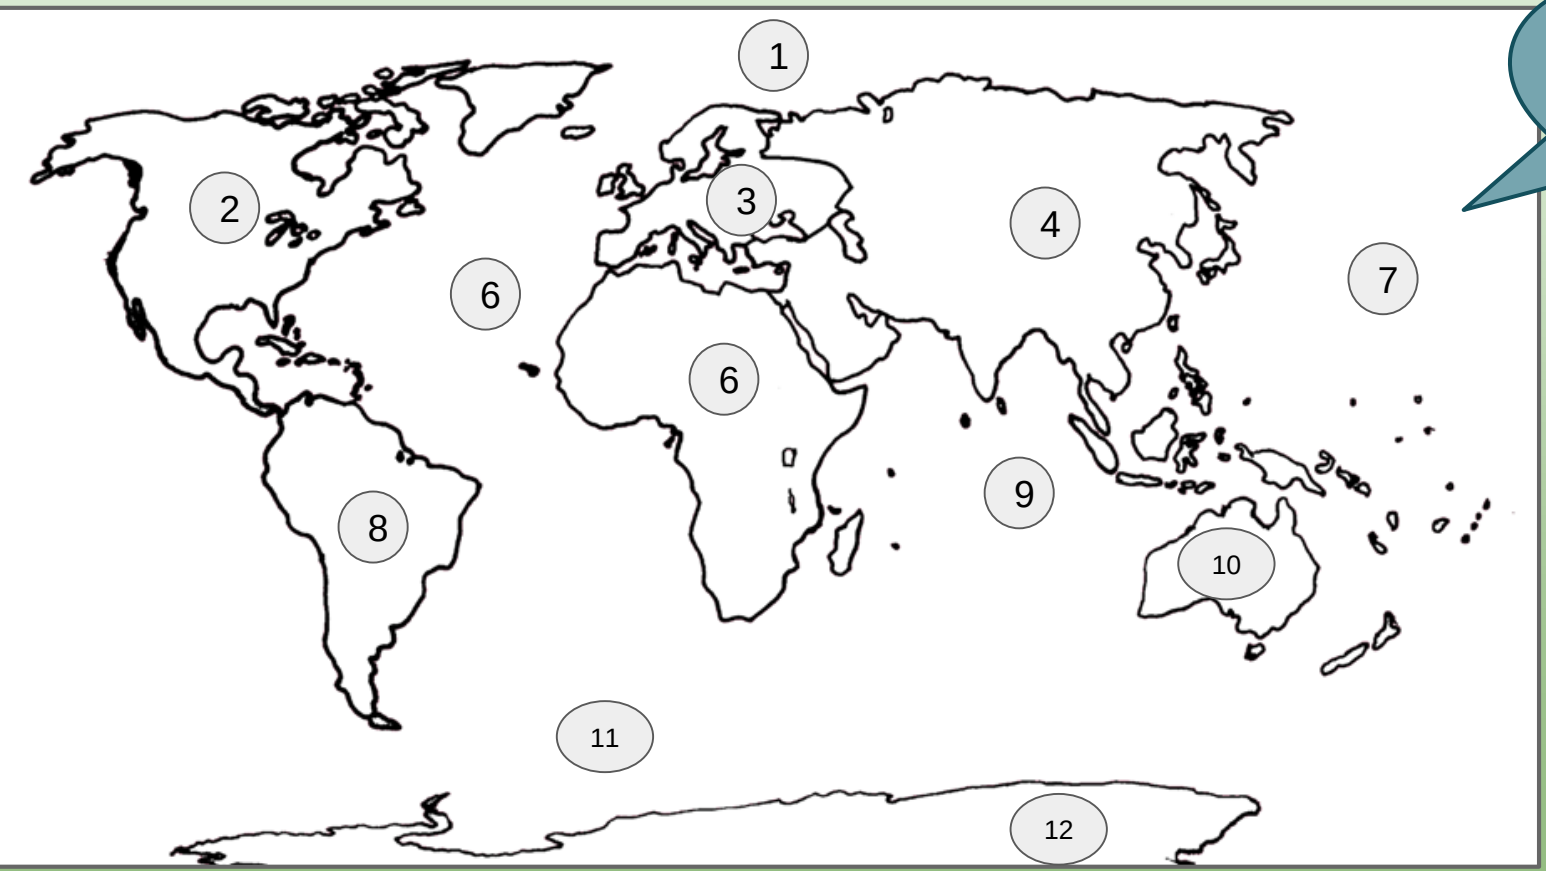
Facts for kids

Let's go on a trip around the world together



Look at the map and then type the number next to the ocean or continent. The first one has been done for you

North America

Africa

Indian Ocean

South America

Australia 10

Southern Ocean

Antarctica

Asia

Atlantic Ocean

Arctic Ocean

Europe

Pacific Ocean

North America

South America
